

Dust Eater

HILTON Industrial Vacuums - 218 Series

Unbeatable Cyclonic

AFPT[™] AIR FILTER PATH TECHNOLOGY

MADE FOR FINE DUSTS

- Coating Compounds
- Concrete
- Rockwall / GIB
- MDF / Wood
- Fibreglass
- Composites
- Flour / Starch
- Coal
- Carbon Fibre
- Paper & Plastics

With the **HILTON Dust Eater Deluxe** vacuum package you are investing in efficiency, investing in productivity, and investing in a clean and safe working environment for you and your staff.

Leave behind the downtime distraction from maintenance and compliance hassles associated with under-performing equipment. Enjoy the reliability and simplicity of a vacuum system built for managing even the difficult waste from your production processes.

The extra powerful motor, a tuned cyclonic action and highly engineered M Class 99.97% filtration multi-sock filter system form the core of the Dust Eater AFPT.

Sustained suction, and unsurpassed cleaning capability with fine dusts, fillings and other industrial wastes mean less mess, less downtime and greater focus on your core activities.

Add extra power, capacity and wet capability with our extensive range of Cyclonic Separators and tool sets.
